>> EDUCATION

B.Tech in AI & Data Science

India | Expected Graduation: 2026

>> SKILLS

Languages & ML: Python, C++, SQL, NumPy, Pandas, scikit-learn

Deep Learning: PyTorch, TensorFlow, Keras, OpenCV, HuggingFace

LLM & RAG: RAG Architecture, Vector DBs (FAISS, Chroma), LangChain

Backend & Infra: FastAPI, Docker, PostgreSQL, MongoDB, Redis, CI/CD

Tools: Git, GitHub Actions, MLflow, Streamlit, Jupyter

>> KEY PROJECTS

BookRecommender -- ML-Powered Recommendation System

Production-grade system with 3 engines (Popularity, Content-Based, Collaborative Filtering). 10K books, 6M ratings. Streamlit dashboard with dark terminal theme. On-demand model loading, cached filters.

RAG Workbench -- LLM + Retrieval Pipeline

End-to-end document retrieval system converting PDFs into grounded AI responses. LangChain, FAISS, Docker - modular ingestion with semantic search.

Inference Console -- ML Model Dashboard

Interactive platform for model predictions with evaluation dashboards, visualization layers, and feedback interfaces. PyTorch + Streamlit.

>> OPEN FOR INTERNSHIPS 2026

Seeking ML / CV / Full-Stack Internship roles starting 2026. Available for on-site, remote, or hybrid positions. Strong foundation in production ML workflows, API design, and system architecture.
